

shud i run eggspearmint?

by bunni

i must movez fast

- eggspearmint aren't fast enuff.
- a headliss chicken is faster than a chicken waddling up to food, but a headless chicken eats less.
 - i can haz metafor?
- "velocity" iz about speed and directionz, like in fisicz. it matterz where you go.
- "Never confuse movement with action."
- diffz-in-diffz are almost as slow as eggspearmintz but more likely to beez wrong.
- you shud run eggspearmint.

eggspearminths miss long-run effectz

- dis iz true.
- we can't detect long-run effectz, so we shudn't detect short-run effectz?
- we shud be happy to be very ignorint, insted uv a lil ignorint?
- silly!
- run eggspearmint.

we cant test everything in an
eggspearmint

- so we shud test nothing?
- silly!
- run eggspearmint.

we don't care about the
effectz, we're just gonna
launch it

- u lie!!!!
- ur gonna ask me (bunni) what the effect
iz.
- admit it!
- now!
- silly!
- run eggspearmint.

thank u

- thank u fur considering running an eggspearmint.
